# PHLEBOTOMY TECHNICIAN

8 Weeks

To a new  
career!

## Career Outlook

Phlebotomists are in high demand and are needed in many medical facilities. A Phlebotomist is a skilled medical professional who is trained thoroughly to draw blood. Job opportunities include hospitals, long term care facilities, Doctor's offices, blood banks, plasma centers and laboratories. Employment of phlebotomists is projected to grow 17 percent from 2019 to 2029, much faster than the average for all occupations. Hospitals, diagnostic laboratories, blood donor centers, and other locations will need phlebotomists to perform bloodwork. Blood analysis remains an essential function in medical laboratories and hospitals. Demand for phlebotomists will remain high as doctors and other healthcare professionals require bloodwork for analysis and diagnosis.
